### Executive summary

The session aimed to present and discuss the results of a NH Pilot Action in the field of impact measurement. In the context of the SL on SWAFS, PA1 had dealt with the question of how the benefits of RRI can be defined and empirically collected at project level.

For this purpose, an international and transdisciplinary core group of 10 committed stakeholders met over the PA's 2-year life span and at the end of the process developed a multi-page template that helps to capture possible short-, medium- and long-term impacts of an RRI project in the three main categories of economic, scientific and societal/democratic benefits. Its usage goes beyond monitoring and evaluating purposes at the end of a project since the broad lists of indicators can

provide project managers with guidance and inspiration in the early design or implementation phase of a project.

This template is available on the NH website:

<https://newhorizon.eu/social-lab-15-pilot-action-1/>

The SL facilitators [Merve](#) and [Susanne](#) are happy to receive feedback on this.
